

## Knee Holder Left

As a leading education solution provider, SYNBONE has developed an innovative knee holder for total knee arthroplasty (TKA) exercise.

The features of SYNBONE PR1336 Knee holder left are:

- Knee positioning with 5 angles (full extension, 15°, 30°, 90° and 120°) as in real surgery
- Consists of 3 major components: holders (base plate & holding plate), foam coat for upper leg, and foam coat for lower leg.
- The entire knee holder is lightweight and can be folded for easy transportation.
- This knee holder can be set up quickly with only two table clamps needed at both ends of the base holders.
- The screws on the knee-holding panel can be manually adjusted to optimize the placement of both upper and lower leg.
- The foam coat for both upper and lower leg is re-useable

**This knee holder is compatible with all left SYNBONE knee models and is delivered without any bone model**
