

SYNBONE – one of the leading suppliers for medical education centers and universities

For over 30 years, SYNBONE continues to be a global market leader providing surgical education models and training systems for healthcare professionals. Our range of more than 1000 human and veterinary standard models reflect the latest requirements to obtain the best education outcome.

SYNBONE is your perfect partner for customised skills training solutions. Amongst others learn more about SYNBONEs' brand new Skills Training Stations; a great solution for improved Joint Reconstruction Training and enhanced basic skills needed for the Total Hip and Total Knee Arthroplasty.

SYNBONEs' skilled engineers are designing innovative products by using comprehensive 3D engineering tools. The newest 3D technologies are used to develop high quality products that meet your needs. SYNBONE designs custom-made models for orthopaedic skills training, surgical simulation and biomechanical testing.

SYNBONE - Competencies and Quality Expertise with worldwide connections

Competence center

Staying current in technology, engineering, state of the art materials and the latest training methods are SYNBONE's investment in the future. Collaboration with customers and Industrial partners is the key to education success.

Quality Expertise

SYNBONE's State-of-the-Art production facility produces over 300,000 models per year. Each product reflects the high quality of Swiss design and engineering.

Global Distribution

A measure of success are the worldwide conducted medical education courses using SYNBONE products every year. Customers in more than 70 countries are supplied with SYNBONE education and simulation models.
