

The SYNBONE-Group is an innovative & fast-growing company, in the field of surgical education, providing advanced anatomical models and simulators for education and surgical procedures. Our customers are representing medical device manufacturers, education institutes, universities, and hospitals in over 70 countries.

As a Quality Inspector, you'll be the frontline guardian of product excellence, meticulously ensuring adherence to the highest quality standards across our diverse range of products. Join our dynamic team and become an integral part of our relentless pursuit of excellence in quality assurance.

Quality Inspector (Malaysia - Kulai, Johor)

Job Description

- To ensure that SYNBONE products and processes meet the established quality standards and specifications.
- Critical role in maintaining product quality, identifying defects or deviations from specifications, and implementing corrective actions to prevent non-conformities.
- To uphold the company's reputation for delivering high-quality products, meet customer expectations, and drive continuous improvements in quality management practices.

Job Responsibilities

- Ensure that products and processes meet established quality standards and specifications.
- Responsible for inspecting, testing, and evaluating various components, materials, and finished products to identify defects, deviations, or non-conformities. Through your meticulous inspections and assessments, you will contribute to maintaining and improving the overall quality and reliability of our products.
- Conduct detailed inspections and tests on raw materials, in-process components, assemblies, and finished products to ensure compliance with quality standards and specifications.
- Maintains Master Samples for Production (Moulding) & Assembly.
- Highlights issues related to Master Samples.
- Monitor and ensure adherence to established quality control procedures and guidelines throughout the production or manufacturing process.
- Collaborate with the quality assurance team to develop, review, and implement quality control procedures, work instructions, and inspection plans.
- Effectively communicate inspection findings, quality issues, and recommendations to cross-functional teams, including production/assembly personnel, and management.
- Assist superior to implement corrective actions and prevent recurring quality problems.
- All other ad-hoc duties assigned by superior whenever arises.
- Comply to 5S as well safety and health regulations.

Job Requirements

- Minimum SPM, Diploma, Advanced/Higher/Graduate Diploma, or any equivalent qualification.
- Preferably minimum 1-3 years of working experience in manufacturing industry.
- Able to work under pressure and meet dateline.
- Good communication and intercultural interacting skills, meticulous and team player.
- Languages: Excellent command of written and spoken English and Bahasa Malaysia.

Benefits & Others

- Internal and/or external trainings for further development.
- Work in an international environment.
- Assured fair performance-based remuneration, based on the grade of work and responsibility.
