

The SYNBONE-Group is an innovative & fast-growing company, in the field of surgical education, providing advanced anatomical models and simulators for education and surgical procedures. Our customers are representing medical device manufacturers, education institutes, universities, and hospitals in over 80 countries.

SYNBONE is seeking a meticulous Quality Control Inspector to perform product inspections, identify non-conformities, and ensure all products meet required specifications and quality standards prior to release.

Quality Control Inspector (Malaysia - Kulai, Johor)

Job Purpose

- To perform appearance, dimensional, and functional inspections on products during production and machine operations.
- To ensure products meet specified quality requirements and inspection standards.
- To identify and report non-conforming products promptly to prevent quality issues from progressing through the production process.
- To ensure inspection activities are properly recorded and conducted in accordance with company quality procedures.

Job Responsibilities

- Perform incoming inspection on raw materials such as resin and mesh in accordance with inspection procedures.
- Verify supplier Certificate of Analysis (COA) for each incoming lot to ensure compliance with specifications.
- Conduct in-process inspections including appearance, dimensional, and functional checks during production or machine operation.
- Use approved working samples or reference standards during first-shot / first-piece inspection for comparison.
- Perform outgoing inspection on finished products to ensure compliance with required quality standards.
- Record inspection results and maintain inspection reports for traceability and documentation purposes.
- Maintain accurate inspection records in accordance with Good Documentation Practice (GDP) and company procedures.
- Handle measuring instruments and inspection equipment carefully and ensure they are returned to designated storage locations after use.
- Comply with the company's Quality Management System (QMS) and Environmental Management System (EMS) policies and objectives.
- Ad-hoc as requested by Superior whenever arises.
- Comply to 5S as well as safety and health regulations.

Job Requirements

- Minimum SPM (Sijil Pelajaran Malaysia) or equivalent qualification.
- Experience in a manufacturing environment; experience in molding or OEM industry will be an added advantage.
- Basic knowledge of ISO quality management systems or related standards is preferred.
- Able to operate basic computer applications including Microsoft Office.
- Good interpersonal and communication skills.
- Basic understanding of inspection procedures, reject identification, and Good Documentation Practice (GDP).
- Ability to handle measuring instruments and inspection tools accurately.

Benefits & Others

- Offers an excellent insurance coverage.
- Internal and/or external trainings for further development.
- Work in an international environment.
- Assured fair performance-based remuneration, based on the grade of work and responsibility.
